STATE WATER RESOURCES CONTROL BOARD
DIVISION OF WATER RIGHTS

ORDER

APPLICATION 15187 PERMIT 9611 LICENSE 4920

ORDER ALLOWING CHANGE IN THE EXISTING POINT OF DIVERSION
AND THE ADDITION OF A SECOND POINT OF DIVERSION

WHEREAS:

1. License 4920 was issued to Harry R. Groves and was filed with the County Recorder of Mendocino County on January 2, 1958.
2. License 4920 was subsequently assigned to John H. Rex.
3. A petition for change in the existing point of diversion, and the addition of a second point of diversion have been filed with the State Water Resources Control Board and said Board has determined that good cause for such changes have been shown.
4. The Board has determined that the petitioned changes do not constitute the initiation of a new right nor operate to the injury of any other lawful user of water.

NOW, THEREFORE, IT IS ORDERED THAT:

1. The points of diversion under this license shall be as follows:
 - 1) South 1,700 feet and West 880 feet from the NE corner of Section 24, T15N, R13W, MDB&M, being within the SE $\frac{1}{4}$ of NE $\frac{1}{4}$ of said Section 24 also described as California Coordinated Zone 2, North 541,600 feet, East 1,649,800 feet.
 - 2) South 2,150 feet and West 950 feet from the NE corner of Section 24, T15N, R13W, MDB&M, being within the SE $\frac{1}{4}$ of NE $\frac{1}{4}$ of said Section 24, also described as California Coordinated Zone 2, North 542,000 feet, East 1,649,900 feet.
2. The paragraph pertaining to the continuing authority of the Board is replaced with the following:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all

or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
